

Umar Qadri

Full-Stack Developer Intern

Motivated Full Stack Intern with experience in Angular, Python, focused on building scalable and efficient web applications with seamless frontend-backend integration. Hands-on experience in developing web scrapers, including a LinkedIn keyword-based data extraction tool, and building LLM-powered chatbots for real-world use cases. Strong practical exposure to Software Quality Assurance (SQA), including manual and automated testing, test case design, and API testing fundamentals. Passionate about clean code, problem-solving, and delivering user-centric, high-quality software solutions.

WORK EXPERIENCE

Frontend Intern

AKVATEQ

Aug 2025 - Mar 2026 | Karachi

Accomplishments / Tasks

- I worked with Angular to understand its complete architecture, including modules, components, and services. I implemented Angular routing for navigation between views and explored lazy loading to optimize application performance. I also learned how Angular's folder structure lifecycle hooks work together to build scalable, maintainable single-page applications.

Employer

Asad Kamran

Software Engineer (Ai) Intern

HexaVibes

Jul 2025 - Jan 2026 | (Remote)

Accomplishments / Tasks

- During my internship, I worked with Python and AI technologies to build intelligent chatbots and automated web scrapers on python.

PROJECTS

Linkedin Scrapper

Python

Built multiple web scrapers for data extraction from websites, including a LinkedIn scraper that collects data based on keywords for targeted information retrieval and analysis. (<https://github.com/Umar-Qadri-850/Linkedin-Scrapper>)

Google Meet Clone

Angular-WebRtc

Developed a **Google Meet-style** web application focusing on the frontend user experience and real-time interaction features, including video call layouts, participant grids, and meeting controls, component-based architecture to simulate a real-time video conferencing experience. (<https://github.com/Umar-Qadri-850/Google-Meet-Clone-WebRtc>)

Quicky Fruity

React

Built the frontend of **Quicky Fruity**, an e-commerce website using React, focused on selling fresh fruits juice online. Designed responsive product listings, shopping cart interfaces, and smooth user navigation to deliver a fast and user-friendly shopping experience. (<https://github.com/Umar-Qadri-850/QuickFruity-React>).
